

Default Chain Class for DEMOS SDK

What is this class?

This is the base class on which all other chain classes are derived

Properties

Dynamic properties of the chain class

provider: any

It is the base to operate on a blockchain in general. It is usually filled at instantiation and it is used in a lot of class functions.

wallet: any

Given a Private Key, we can also write on the blockchain. It is usually filled on demand and it is used in a lot of class functions.

Methods

connectWallet(privateKey: string): any;

Fill this.wallet by connecting with a private key to the blockchain

getBalance (address: string): Promise

Get the balance of the address on the blockchain

sendTransaction (transactions: any): any

Send a transaction on the blockchain, using this.wallet as sender
